

MONISHA B

Full Stack Developer

Tirupattur | +91 6385328560 | monishabalsum@gmail.com |

Portfolio: monisha-protfolio.netlify.app | **GitHub:** github.com/Monisha1509 |

LinkedIn: linkedin.com/in/monisha-b-7a652123a

OBJECTIVE

Entry-level Full Stack Developer with hands-on experience building scalable web applications using React, Next.js, Node.js, Python, and MongoDB. Strong in REST APIs, authentication (OAuth, JWT), database design, and deployment workflows. Seeking to contribute to a growth-oriented development team.

EXPERIENCE

Highbrow Technology Inc — Customer Support Consultant

Aug 2025 – Jan 2026

- Participated in secure real-time voice recording sessions for AI model training.
- Contributed to improving conversational AI systems through high-quality dataset validation.
- Maintained strict quality and accuracy standards.

Chandusoft Technologies Private Limited — Junior Engineer

Oct 2023 – Nov 2024

- Collaborated with cross-functional teams to develop and maintain web-based applications.
- Improved website performance and user experience through feature enhancements.
- Performed testing, debugging, data validation, and reporting using internal tools and Excel.
- Assisted in resolving technical issues and maintaining application stability.

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, React.js, Angular, Bootstrap, Next.js
- **Backend:** Node.js, Express.js, Django, PHP, .NET
- **Programming:** Python, Java (Core), JavaScript
- **Database:** MongoDB, MySQL, PostgreSQL (Supabase), Firebase
- **Tools & Concepts:** REST APIs, Git & GitHub, Google OAuth 2.0, JWT, Supabase, LocalStorage, Debugging, Error Handling, Vercel, Netlify, CI/CD

PROJECTS

Smart Bookmark Web Application

Live: smart-bookmark-app-delta-two.vercel.app

GitHub: github.com/Monisha1509/smart-bookmark-app

- Developed a Full Stack Bookmark Management Application using Next.js (App Router) and Supabase.
- Implemented Google OAuth 2.0 authentication with secure JWT-based session handling.
- Configured PostgreSQL database using Supabase with environment variable management.
- Built secure user-specific bookmark storage and API integration.
- Deployed production-ready application using Vercel.

Online Bookstore Web Application (Full Stack Project)

GitHub: github.com/Monisha1509/online-bookstore

Demo: (https://drive.google.com/file/d/1lkABUmGi3g6Qy5glQToTYMp87RKIF3_6/view)

- Developed a full-stack web application using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB.
- Designed and implemented RESTful APIs for book listing, book details, and order creation.
- Implemented shopping cart functionality using LocalStorage with dynamic total calculation.
- Designed MongoDB schemas for Books and Orders collections.
- Applied backend business logic using isSold flag to dynamically hide purchased books.
- Implemented structured error handling and API debugging for real-world scenarios.
- Demonstrated complete end-to-end workflow including frontend UI, backend APIs, and database integration.

Library Management System (Angular 16 + Firebase)

- Developed role-based Library Management System using Angular 16 and Firebase (Firestore)
- Implemented Authentication (Email/Password Login) with role-based access (Admin/User)
- Built modules: Dashboard, Books, Issue (Take), Return, Logout using Angular Routing
- Designed responsive UI using Angular Material / PrimeNG
- Implemented Form Validation, Reusable Components, Services Architecture
- Integrated real-time data handling with Firebase Firestore
- Structured application with component-based architecture & API-ready design

LIVE WEBSITE PROJECTS

- **Monisha Tech Design** – monisha-tech-design.netlify.app
Developed responsive business portfolio website.
- **PK Ventures Corporate Website** – pk-ventures-website.netlify.app
Designed structured corporate-style website.

- **Sweet Crumbs Bakery Website** – sweet-crumbs-bakery-web.netlify.app
Created modern bakery website with mobile-first design.

Alzheimer's Disease Prediction using Deep Learning

- Developed an Alzheimer's Disease Prediction System using Deep Learning and CNN models on MRI brain scan images.
- Implemented data preprocessing, feature extraction, segmentation (OTSU), SMOTE sampling, and feature scaling techniques,
- Applied Transfer Learning and classification algorithms (SVM, Random Forest) for improved prediction accuracy.
- Evaluated model performance using Precision, Sensitivity, Specificity, and Validation metrics.
- Integrated the system with Arduino, GSM module, and LCD display for real-time disease prediction output.

CORE COMPETENCIES

- Full Stack Development
- REST API Design
- Authentication & Authorization
- Database Design
- Debugging & Optimization
- Deployment & CI/CD

EDUCATION

- KCG College of Technology, Chennai — B.E. Electronics and Communication Engineering (2023) | 82%
- Al-Ameen Matriculation Higher Secondary School, Tirupattur — HSC (2019) | 55%
- Al-Ameen Matriculation Higher Secondary School, Tirupattur — SSLC (2017) | 78%

CERTIFICATIONS

- Full Stack Developer Course — Besant Technologies
- Programming with Python Professional Certificate — OpenEDG Python Institute
- Python 101 for Data Science — Cognitive Class
- SQL and Relational Databases 101 — Cognitive Class

LANGUAGES

English, Tamil
